## OBJECTIVE

My ultimate objective is to pursue a career in environmental design. I recently received my A.S. in architecture design and am currently seeking to enter the field to earn real world experience in architecture.

## EDUCATION

- Diablo Valley College - 2019  
(A.S. in Architecture Design)
- Mount Diablo High School - 2010

## AREAS OF EXPERTISE

- Microsoft Office
- Adobe Suit
- Revit
- Vector Works
- Maya
- Marketing
- Rhino
- Rendering
- AutoCAD
- Solid Works
- Sketch Up
- Team Work
- Fusion 360
- Technical Drawing
- Team Management

## AWARDS & EXHIBITIONS

- 24th National ATE Principle Investigators Conference in Washington DC 2017
- Diablo Valley College Art Exhibition
- Cal Poly Design Village 2017

## EXPERIENCE

**OCTOBER 2019 - MARCH 2020**

### AUTOCAD DESIGNER

#### NETCOR DESIGN SYSTEMS

I was part of the team doing low voltage CAD drawings for our clients such as Cisco, LMI, and most recently Juul. I did work on the telecoms systems in the building that house these companies and produced a working drawing set using the Netcore drafting standards. This required me to read and edit current architectural drawings as well. Much of my work required me to work alone and with a team as well as making design decisions.

**APRIL 2019- JULY 2019**

### AUTOCAD STORE PLANNER

#### ROSS STORES INC.

While at Ross Stores I was part of the Store Planning team on the refresh project. I would be given a store that I would need to draw an existing floor plan with dimensions and a proposed plan as well. I would be required to plot the plans and submit them for review and complete red line edits. I would also use data extraction for the purposes of ordering fixtures which were represented by blocks that I would sometimes need to edit.

**2018 - 2019**

### CAD TECHNICIAN

#### FOUNDATION PATENTS, LLP

I would use a combination of Auto CAD, Fusion 360, and the Adobe Suite to create invention drawings based on sketches I was provided and sketches I would make during client meetings. I would then produce 3D renderings in some cases mostly using Fusion 360 that I would then plot to PDF in order to be included in the drawing set.

**2007 - 2010**

### APPRENTICE CARPENTER

#### RAINAS FLOORING

My job comprised of laying hardwood flooring. I would then begin the process of sanding, sealing, staining, and applying finish to the floor. Also in this role I would preform various other tasks such as trimming, electrical work, and plumbing.

**2018 - PRESENT**

### FRONT-END ASSISTANT

#### COSTCO

This role requires me to assist cashiers and maintain the floor. It is a very fast paced environment in which I am required to be productive at all times.

**2016 - 2018**

### MERCHANDISER

#### BEST BUY

During my time at Best Buy I was responsible for keeping the floor stocked, displays functioning, and planograms set to corporate standard every week.

**2015 - 2016**

### ASSISTANT GROCERY MANAGER

#### SPROUTS FARMERS MARKET

At Sprouts I was an overnight Assistant Grocery Manager. This task put me in a leadership role. I was a key holder for the store as well as in charge of ordering product and overseeing the throwing of our loads. We would also see to the erection of any displays or changes in product that was required.
